

HIV YOUTH CODEBOOK
Coding Manual for All Data Collection Points

Important Coding Note: As explained in the Administration Guides, this is a modular survey. The sections to be administered to a participant depend on the length of the intervention received by that participant. If the data record being coded comes from an intervention lasting less than 30 days, some of the variables included in this codebook will not appear on the survey form. Variables corresponding to questions not on the survey form should be coded as 98 (left blank). The following table indicates the questions that will be excluded from the survey form and should be coded as 98.

Intervention Duration	Sections Of Survey To Be Administered	Questions Excluded From Survey And Coded As 98	Questions Not Selected To Be Administered And Coded 95
Single Session Intervention	Pages 1-9 <ul style="list-style-type: none"> • Section One: Facts about You • 3 to 5 items from Section Two: Attitudes & Knowledge 	<ul style="list-style-type: none"> • Questions 18-63 selected to be administered but not answered by participants should be coded 98 • Questions 64 through 128 NOT on survey and coded 98 	Questions 18-63 (Section Two) that are not selected to be administered should be coded 95

There is a special code which applies only to the new items listed in the table below. These include items 16-17 in Section One, and items 68-69 in Section Three. If you have collected data using the prior version of the paper questionnaire which does not include these questions, you should use code 88 (not in survey) for these items.
